2026 Coliving Cashflow Academy

Marketing & Operating Plan | Coliving Real Estate Investing Education
DIY On-Demand Program + Done-With-You Live Weekly Coaching

Agenda

- 1. Goal / Target
- 2. Lean Canvas Business Model
- 3. Unique Selling Proposition (USP)
- 4. Audience and Avatar
- 5. Product Features and Benefits
- 6. Branding
- 7. Customer Acquisition — Channels, Affiliates, Lead Gen, Funnels
- 8. Content Calendar & PR
- 9. Operating Cadence, KPIs & Compliance Guardrails
- 10. New Initiatives & Recap
- Addendum: Supercharger Strategies & Achievable Results

GOAL / TARGET

2026 OKR Goal

$6,240,000 Top Line Revenue

Revenue Stream	Units	Price	Revenue
Done-With-You Coaching (live weekly coaching + full program access)	420	$7,500	$3,150,000
DIY On-Demand Program (self-paced)	2,400	$997	$2,392,800
Low-Ticket Starter Kit + order bumps	7,000	$67 avg	$469,000
Affiliate / partner revenue	—	—	$228,200

Revenue model is anchored by the high-ticket DWY tier; DIY and low-ticket fund cold-traffic acquisition and feed ascension. Quarterly pacing: $1.56M/quarter, $120K/week blended.

BUSINESS MODEL

Lean Canvas Business Model

Problem	Solution	USP	Unfair Advantage	Customer Segments
Traditional rentals don't cash flow at today's rates and prices. Landlords can't make existing properties perform. Room-rental operators drown in zoning, setup, and tenant management.	Coaching platform that teaches investors to convert ordinary houses into compliant coliving properties cash flowing 2–4x a normal rental. Key metrics: new students; DIY→DWY ascension; first room rented in 90 days; CAC.	Turn one ordinary house into 2–4x the rent — without buying more property. High-level concept: the operating system for coliving investing.	Founder operates a real coliving portfolio with verifiable numbers. Platform and proptech partnerships. Community of operating hosts, not just students. Channels: YouTube, Meta, Google, podcasts, Skool, email.	Landlords whose rentals stopped cash flowing. W-2 professionals seeking yield from 1–2 properties. House hackers ready to systematize. Mission-driven investors (workforce housing).

Cost structure: SaaS stack, coaching payroll, media spend, affiliate commissions, legal review. | Revenue streams: DWY enrollments, DIY tuition, low-ticket products, affiliate commissions.

MESSAGE AND POSITIONING

Unique Selling Proposition (USP)

Coliving Cashflow Academy USP

“Don’t buy more doors. Unlock the doors you already have.”

Coliving Cashflow Academy helps everyday investors turn one house into 2–4x the cash flow through compliant, professionally run room-by-room rentals — with coaching at the level of help you actually need.

Positioning rule: all earnings language is framed as rent mechanics (market rent per room vs. whole-unit rent) — never personal income promises.

CUSTOMERS

Audience and Avatar

Student Avatar: “Cashflow Chris”

- 30–50 years old, ~55% male / 45% female, college educated, household income $85–150K.
- Owns a primary home; roughly half already own one rental that underperforms.
- Lives in growth metros with strong room-rental demand: Atlanta, Houston, Dallas, Phoenix, Charlotte, Tampa, Indianapolis.
- Analytical and skeptical: wants spreadsheets, walkthroughs, and legal clarity — not hype.
- Time-constrained professional (tech, healthcare, skilled trades, ex-military); often researching with a spouse or partner as co-decision-maker.
- Motivated by cash flow that survives high interest rates, and by the affordable-housing impact of providing clean rooms at attainable rents.

Symbols, Virtues, Vices and Heroes

Symbols:

– Rent-roll screenshots, before/after room makeovers, paid-off HELOC, family vacations funded by cash flow, tidy operating dashboards.

Virtues:

– Numeracy, patience, compliance, systems-building, family security, providing quality housing, financial independence over flash.

Vices (what they avoid):

– Get-rich-quick hype, over-leverage, guru worship, analysis paralysis, quitting after one bad tenant experience.

Heroes:

– Operators who show real numbers: BiggerPockets-style educators, Coach Carson–type frugal investors, local landlords with paid-off portfolios, founders solving housing affordability.

Goals and Values

Goals

- Replace 50–100% of W-2 income with durable rental cash flow.
- Make the properties they already own actually perform.
- Launch a first coliving conversion within 90 days.
- Build a repeatable system — not a second job.
- Join a community of real operators to learn alongside.

Values

- Numbers over hype; proof over promises.
- Compliance and doing it right (zoning, leases, insurance).
- Time freedom and family security.
- Housing impact: quality rooms at attainable rents.
- Continuous learning and self-investment.

Demographics, Affinity Interests and Top Metros

Age and Gender:

– Core 30–50 (≈70% of audience); ~55% male / 45% female.

Affinity Audiences:

– Real estate investing, personal finance / FIRE, landlord & property management tools, home improvement / DIY, small-business owners.

Top Acquisition Metros:

– 1. Atlanta 2. Houston/Dallas 3. Phoenix 4. Charlotte 5. Tampa 6. Indianapolis

– Selection criteria: room-rental demand, landlord-friendly rules, price-to-rent ratios, and clear (or navigable) occupancy ordinances.

How They Research and Browse

Devices & Behavior

- ~60% mobile / 40% desktop; long-form research happens on desktop in the evening.
- Watches YouTube at 1.5–2x speed; saves videos to playlists before buying.
- Reads reviews and searches “[program name] + scam / review” before any purchase.
- Asks AI assistants (ChatGPT, Gemini, Claude) to analyze deals and compare programs.

Implications

- Long-form YouTube is the trust engine; shorts are discovery only.
- Own the review/comparison search results with honest content.
- Publish structured, citable data so AI assistants reference us (GEO).
- Mobile-first funnel pages; desktop-grade webinar experience.

Sources of Information

YouTube: BiggerPockets, rent-by-the-room operator channels, Coach Carson–style educators, house-hacking creators.

Podcasts: BiggerPockets Real Estate, Real Estate Rookie, regional REI shows, personal-finance/FIRE pods.

Communities: Skool and Discord investing groups, BiggerPockets forums, r/realestateinvesting, local REIA meetups.

Platforms & tools: Room-rental marketplaces, mid-term rental platforms, landlord software blogs.

AI assistants: Deal analysis, market questions, “is rent-by-the-room legal in my city?”

Newsletters: REI and personal-finance newsletters; data-driven market reports.

Challenges and Pain Points

- “My rental barely breaks even” — current portfolio underperforms at today's rates.
- Zoning and occupancy fear: “Is renting by the room even legal in my city?”
- Tenant-conflict fear: “I don't want to referee roommates.”
- Setup uncertainty: furnishing costs, conversion scope, what to budget.
- Financing and insurance confusion for room-by-room operation.
- Analysis paralysis from contradictory free content.
- Time scarcity: needs systems and management playbooks, not more theory.
- Discouragement risk: expects results in 90 days or starts doubting the model.

Roles and Objections

Roles

- Sole decision-maker up to ~$1,000 (Starter Kit, DIY tier).
- Spousal/partner sign-off expected at the $7,500 DWY tier.
- Sales assets include a “partner brief” PDF: the numbers, the time commitment, and the risk controls — built for the kitchen-table conversation.

Objections (each gets a dedicated funnel asset)

- “How is this different from free YouTube house-hacking content?”
- “Is this legal in my market?” → city compliance database.
- “Will my insurance and lender allow it?” → vendor rolodex + guides.
- “I don't have time to manage rooms.” → management systems module.
- “Why is there no income guarantee?” → compliant proof + refund terms.

OFFER LADDER

Product Features and Benefits

Lead Magnet: Coliving Cashflow Calculator + eBook

Features

- Free room-rent calculator: enter an address, get projected per-room vs. whole-unit rent.
- Companion eBook: “The 2–4x Rent Math” with embedded videos.
- City-by-city legality checklist (top 25 metros).
- 5-day email mini-course onboarding.

Benefits

- Know in one weekend whether coliving works for your address and market.
- Free value up front; builds trust before any pitch.
- GOAL: capture leads, then ascend to Starter Kit and DIY program.

Coliving Starter Kit (Low Ticket)

Features

- 10-video mini-course: the coliving model end to end.
- Room-Rent Comp Calculator (full version).
- Furnishing budget worksheet + house-rules starter template.
- Order bumps: lease addenda pack, screening checklist.
- Lifetime access.

Benefits

- Validate the model on your own property before investing further.
- Self-liquidating front-end: funds cold-traffic acquisition.
- Qualifies buyers for ascension into the DIY program.

DIY On-Demand: “Coliving Operating System”

Features

- 8-week self-paced curriculum, 70+ step-by-step videos.
- Modules: deal analysis, zoning & occupancy compliance, conversion & furnishing playbook, room pricing, tenant screening & house rules, management systems.
- Downloadable lease addenda, house-rules templates, budget sheets.
- Community access + monthly recorded Q&A.
- Lifetime access including content updates.

Benefits

- Everything needed to launch a first coliving property on your own timeline.
- Templates remove legal guesswork and setup paralysis.
- Community provides real operator answers between launches.
- Natural upgrade path to DWY when hands-on help is wanted.

FEATURES AND BENEFITS | $7,500 • 12 MONTHS

Done-With-You: “Coliving Accelerator”

Features

- Everything in the DIY program, plus:
- Live weekly group coaching — separate acquisitions call and operations call.
- Deal-review desk: submit a property, receive a recorded analysis within 48 hours.
- 1:1 onboarding session and a personalized 90-day launch plan.
- City-specific compliance review checklist.
- Vendor, lender, and insurance rolodex.
- Private DWY-only community tier.

Benefits

- Your first conversion is reviewed at every step by people operating coliving properties today.
- Speed and de-risking — not just information.
- Accountability cadence keeps the 90-day launch on track.
- Spouse-ready ROI story: one converted property can return the tuition in year-one incremental rent (results vary by market and execution).

Offer Ladder and Ascension Logic

Tier	Price	Role in the Business	Ascends To
Lead Magnet (calculator + eBook)	Free	Capture demand; demonstrate the math	Starter Kit / DIY
Coliving Starter Kit	$47–$97	Self-liquidate ad spend; qualify buyers	DIY program
DIY Coliving Operating System	$997	Core volume product; community growth	DWY Accelerator
DWY Coliving Accelerator	$7,500	Profit anchor; success stories engine	Alumni mastermind (2027)

Upsell driver is level of help, not more content. Target DIY→DWY ascension: 8% in-year.

BRAND FOUNDATION

Branding

Brand Pillars and Visual Identity

Brand Pillars

- Calm: no hype, no urgency theatrics, no rented exotics.
- Numerate: every claim ships with a spreadsheet or walkthrough.
- Operator-credible: founder's real portfolio on camera, numbers shown.
- Impact-aware: coliving as a workforce-housing solution.

Visual Identity

- Warm residential photography: real rooms, real common spaces.
- Data-visualization accents: rent comparisons, dashboards.
- Palette: deep navy + warm sand; clean editorial type.
- Consistency system across site, course portal, ads, and social.

CHANNELS, AFFILIATES, LEAD GEN AND FUNNELS

Customer Acquisition

Paid Channel Allocation and ROAS Targets

Channel	Budget Share	Primary Job	ROAS Goal
YouTube + Google Search	45%	High-intent demand capture; long-form trust for DWY	3.0x
Meta (Facebook / Instagram)	35%	Lead magnet + Starter Kit volume; retargeting	2.3x
Podcast & newsletter sponsorships	15%	Borrowed trust with REI audiences	3.3x
TikTok (experimental)	5%	Discovery test; must clear 1.5x gate to scale	1.5x gate

Budget rebalances quarterly toward the best blended-CAC channel; no channel exceeds 50%.

Paid Channel Performance Targets

Metric	YouTube/Google	Meta FB/IG	Sponsorships
Cost per lead (magnet)	$12	$9	$15 effective
Cost per booked DWY call	$450	$550	$400
Application → call show rate	70%	65%	75%
Call → close rate	30%	27%	32%
Blended cost per new customer	$2,600	$3,000	$2,400
Average order value (anchor)	$7,500 DWY	$997 DIY-led	$7,500 DWY

UTM-to-CRM attribution on every lead: source → campaign → ad set → creative, joined to closed revenue for true ROAS by creative.

Organic Channel Mix

YouTube channel (flagship): weekly property-walkthrough and deal-breakdown videos with real numbers; shorts cut from every long-form.

Free Skool community: nurture engine; weekly free live class; soft path to DIY and DWY.

SEO + GEO: programmatic city pages (“Is rent-by-the-room legal in {city}?”) structured for AI-assistant citation; calculator as the click-through hook.

Instagram / Facebook: student proof, behind-the-scenes operations, retargeting fodder.

Founder podcast guesting: target 40 shows in 2026.

Email newsletter: weekly rent-per-room data insight + one student story.

Affiliate Overview — The “Army” Strategy

- Rather than relying on a few large affiliates to drive hundreds of sales, we recruit a wide army of smaller partners each expected to drive a handful of sales.
- Example math: 100 affiliates × 3 DIY sales × $997 ≈ $300K, plus DWY referrals at a $500 flat bounty per enrollment.
- Two partner categories: businesses (proptech, services) and individuals (creators, community leaders, successful students).
- Rock-star affiliates get launch-week incentives and co-created content; the long tail gets swipe files, tracking links, and a monthly affiliate newsletter.

Every affiliate signs an earnings-claims compliance addendum and uses pre-approved claims language.

Affiliate Revenue Goals

2026 affiliate revenue goal: $228,200 (≈5% of program revenue)

	Q1	Q2	Q3	Q4
Quarterly	$57,050	$57,050	$57,050	$57,050
Monthly	$19,017	$19,017	$19,017	$19,017
Weekly	$4,389	$4,389	$4,389	$4,389

- Split: internal partner commissions ~35% • external affiliate-driven sales ~35% • cross-promotions ~30%.
- Quarterly promo calendar: one external affiliate push per month (Starter Kit), internal tool promos ongoing, one cross-promo partner per quarter.

Affiliate Partners and Commissions

External (they promote us)

- REI YouTubers & newsletter writers (Tier 1): 40% on DIY; $500 flat per DWY enrollment.
- Community promoters & successful students (Tier 2): 25% on DIY.
- Tier upgrades earned by volume and content quality.

Internal (tools we teach with, paying us)

- Room-rental platform host referrals.
- Property management / room-management software.
- Furnishing and turnkey setup partners.
- Landlord insurance brokers; tenant-screening services.
- Banking, bookkeeping, and entity-setup services.

Funnel Structures

#	Funnel	Path	Key Conversion Targets
1	DWY Application Funnel	YouTube/podcast → free training → application → call → enroll	25% application→call • 30% call→close
2	DIY Funnel	Lead magnet → 5-day email mini-course → $997 offer (+ payment plan downsell)	3.5% lead→sale in 30 days
3	Starter Kit Funnel	Cold Meta traffic → $47–$97 offer + order bumps	Self-liquidating (≥1.0x day-30)
4	Community Funnel	Free Skool tier → weekly live class → DIY/DWY	4% member→customer/quarter
5	Organic Site	City legality pages + calculator → email capture	12% visitor→lead

PR Goal & Content Calendar

R Objective: own “coliving investing” as a category

- KR1: 40 podcast/YouTube collaborations in 2026.
- KR2: YouTube to 100K subscribers; 1M long-form watch-hours.
- KR3: 2 mainstream press placements on the workforce-housing angle.
- Monthly: rent-per-room index by metro — a citable data report for press and AI search.

Weekly Content Cadence

- 1 long-form YouTube: deal breakdown or student property tour.
- 3 shorts/reels cut from the long-form.
- 1 newsletter: data insight + one student story.
- 1 free live class in the community.
- 2 student-win posts with compliant framing (documented, “results vary”).

GET EXCITED

New Initiatives

AI Deal-Analyzer Assistant: students upload a listing, receive a coliving pro-forma — retention feature and demo-able marketing hook.

Verified Student Results Registry: opt-in, documented before/after rent numbers; the compliant proof engine for all advertising.

City Compliance Database: the #1 objection becomes our owned, defensible asset.

Partner/Spouse Brief: kitchen-table PDF that closes the DWY second decision-maker.

Alumni Operator Mastermind ($15K tier): launches once 100+ DWY students operate properties — the 2027 revenue layer.

Operating Cadence and KPI Dashboard

Cadence	Review	Owner
Daily	Ad spend vs. CAC guardrails; lead volume; call bookings	Media buyer
Weekly	Funnel conversion by stage; show rate; close rate; affiliate sales; content shipped	Marketing lead
Monthly	Blended CAC vs. LTV; DIY→DWY ascension; student success rate (first room rented in 90 days); churn	GM
Quarterly	Channel rebalance; pricing review; offer tests; OKR scoring	Founder + GM

North-star metric: students with first room rented within 90 days. Student success drives referrals, proof, and ascension — it is the marketing engine.

Risk and Compliance Guardrails

Earnings claims: all marketing uses rent-mechanics framing and documented student results with “results vary” disclosure; legal review of every funnel asset and ad batch.

Messaging: no cold SMS. Email + retargeting + community for nurture; any SMS is single-opt-in transactional (call reminders) on registered traffic.

Affiliates: signed compliance addendum; pre-approved claims library; spot audits quarterly.

Curriculum: zoning/occupancy taught as a first-class module; city database maintained by counsel-reviewed process.

Refund policy: clear, published terms — a trust asset, not fine print.

Platform risk: no channel over 50% of paid budget; owned email list and community are the moat.

Recap: Coliving Cashflow Academy 2026

Goal: $6,240,000 top-line revenue, anchored by the $7,500 DWY Coliving Accelerator.

- Offer ladder: free calculator → $47–$97 Starter Kit → $997 DIY program → $7,500 DWY coaching → 2027 alumni mastermind.
- Acquisition: YouTube/Google-led (45%), Meta (35%), sponsorships (15%), TikTok test (5%); organic flywheel through YouTube, Skool community, and GEO city pages.
- Affiliate army: many partners × few sales each; $228K goal with compliance built in.
- Operations: weekly funnel reviews, quarterly channel rebalancing, student success (first room rented in 90 days) as the north-star metric.
- Brand: calm, numerate, operator-credible — proof over promises.

ADDENDUM

Supercharger Strategies & Achievable Results

Supercharger Strategies (1–3)

1. Joint-Venture Launch Circuit — projected +$1.2M

- Four launch windows per year, each with 3 aligned partners (REI educators, proptech platforms, large newsletters) running co-hosted webinars to their lists. 12 JV webinars × ~400 attendees × 4% DWY application rate at standard close rates.

2. Quarterly “Coliving Launch Weekend” virtual event — projected +$900K

- $97 ticket, 2-day implementation event (analyze a real deal live, build your 90-day plan). 1,500 attendees/quarter; ticket revenue covers production; 3% DWY conversion + DIY bundle upsell.

3. Founder YouTube Flywheel at 2x cadence — projected +$700K

- Two long-forms weekly plus a monthly “portfolio P&L on camera” series. Organic DWY applications compound: channel-attributed enrollments at near-zero CAC improve blended ROAS and fund more paid scale.

Supercharger Strategies (4–6)

4. Student Referral Engine — projected +$350K

– $500 credit or cash per referred DWY enrollment; automated ask at each student milestone (first room rented, first property converted). Success-based, near-zero CAC.

5. GEO City-Page Moat at scale — projected +$300K

– Expand from 25 to 150 city legality pages with structured data and monthly rent-per-room index. Becomes the cited source in AI answers and search for “is rent-by-the-room legal in {city}” — durable, compounding lead flow.

6. Book + Self-Liquidating Offer + Paid Newsletter — projected +$250K

– $9.97 book funnel (“The Coliving Cashflow Method”) feeding the ascension ladder, plus a $15/mo premium data newsletter (metro rent-per-room reports) that monetizes non-buyers and warms future DWY students.

Achievable Results: Base vs. Supercharged

Scenario	Revenue	DWY Students	DIY Students	Blended CAC	Assumption Level
Base plan (this deck)	$6.24M	420	2,400	$2,400–3,000	Targets hit at stated rates
Base + Superchargers (conservative)	$8.5M	~620	~3,200	improves ~15%	4 of 6 levers at 70% of projection
Base + Superchargers (full execution)	$9.9M	~760	~3,800	improves ~25%	All 6 levers at projection

Why the levers compound: JV launches and the event create demand spikes; the referral engine and YouTube flywheel lower blended CAC; lower CAC funds more paid spend at the same ROAS guardrails.

Conditions: results assume the stated conversion rates, a staffed coaching and sales team, and 12 months of consistent execution. These are projections, not guarantees — actual results depend on execution, market conditions, and compliance with all advertising standards.
